II. Purpose of Addendum

To determine appropriate capacity for the day camp program and campsite.

III. Methodology

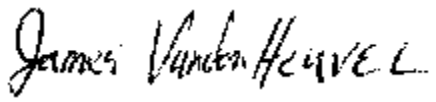

On 2/24/20, a onsite inspection was conducted at the campsite. A review of the applicable indoor, outdoor, and bathroom facilities was completed.

IV. Description of Findings and Conclusions

The campsite indoor space for inclement weather includes multiple classroom areas and bathroom facilities. The indoor space includes maple/oak classroom; Cedar classroom; and Pine classroom. The bathroom facilities available at the nature center, visitor center, stables, and north shelter are enough for the number of campers proposed.

V. Recommendation

I recommend increasing total approved capacity from 50 campers to 85 campers.
