III. Methodology

05/26/2023	Contact – Document Received from administrator, Tanequa Hampton.
10/11/2023	Records review completed

IV. Description of Findings and Conclusions

On 5/26/23, the department received a written request for modification of the children's day camp and campsite at the Kalamazoo Nature Center. The request read, "We are currently licensed for a capacity of 150 and would like to increase our capacity to 180 campers." Ms. Hampton provided a table listing the buildings indoor space with footage, outdoor common space capacities, and number of toilets and urinals.

I reviewed the buildings capacity and available outdoor space provided by Ms. Hampton. The indoor and outdoor space supports the increased capacity.

I reviewed the number of toilets facilities located in five locations on the property. The table listed the total number of toilets as 10 female toilets, five male toilets plus four urinals, two unisex/family bathrooms, and one porta potty.

I reviewed the Environment Health Inspection (EHI) completed by Kalamazoo County Environmental Health Department on 5/15/23. The inspection received an "A" rating. The inspection notes the camp has two wells and they were code compliant per Type II inspection.

V. Recommendation

I recommend the modification of the capacity terms to be approved to 180 campers.
