II. Purpose of Addendum

The licensee requested a modification to the terms of the camp capacity from 60 to 65 campers.

III. Methodology

04/29/2026	Contact-Document Received
05/06/2026	Licensing Record Review

IV. Description of Findings and Conclusions

On 4/29/26, the department received an email from Detroit Parks and Recreation, enrichment program manager, Lauren Wright. Ms. Wright requested the capacity for the Patton Recreation Center and Patton Outdoor Adventure Camp be modified from a capacity of 60 to a new capacity of 65 campers. The email included an attachment of the floor plan of the Patton Recreation Center.

On 5/6/2026, I reviewed the Bureau Information Tracking System (BITS) database. The search reviewed the children's camp and campsite capacity was listed as 60 campers.

I reviewed the Patton Recreation Center floor plan. The building is a two story recreation center with pool, gym, locker rooms, multipurpose rooms, staff offices, and bathrooms.

I reviewed the original licensing study report dated 8/13/21. The report read "The day camp is held at Patton Community Center" and the site utilizes indoor classroom space, large multipurpose room, gymnasium, and bathrooms. The outdoor environment includes outdoor sport fields, playground, hiking trails, and green space.

I reviewed an original addendum report dated 4/10/2025 within the licensing record. The report was generated from a request to modify the capacity from 45 to 60 campers. The inspection completed on 4/8/2025 reviewed the indoor spaces used for children's day camp identified by Ms. Wright. The report read "Ms. Wright identified the designated spaces for the children's camp indoor shelter as the "computer lab (723 sq/ft) and the "dance room" multipurpose room (1503 sq/ft). The facility has indoor bathrooms available to support the capacity increase. The outdoor space includes 22 acres park with a pavilion, playground, outdoor track, ball field, basketball courts, and open fields for activities."

Capacity for children's day camps include adequate indoor shelter, adequate outdoor space, and bathrooms. Based on the findings of this review, the campsite can support the capacity change from 60 to 65 campers. In the future, if there are any capacity request, the licensee must provide additional indoor shelter designated areas for campers.

V. Recommendation

I recommend the capacity terms of this license to be modified from 60 to the approved capacity of 65.
