II. Purpose of Addendum

The camp operator submitted a request for modification to the capacity terms of the license on 6/4/21. The camp operator requested a modification to increase from 50 campers to 100 if possible.

III. Methodology

On 6/4/21, I received an email from the licensee with pictures of the facilities outside space, inside space, and a description of the number of bathrooms.

On 6/8/21, I conducted an onsite inspection of the campsite. I toured the gymnastics facility site. I examined the indoor spaces, outdoor spaces, and bathrooms.

IV. Description of Findings and Conclusions

The Mills Gymnastics Facility includes 50,000 square feet of indoor activity space including trampolines, tumbling mats, beams, and other gross motor activity areas along with meeting rooms, bathrooms, and public viewing areas. The outdoor space includes 5600 square feet of grass area and surrounding parking lot. The grass area will accommodate based on 75 sq./camper an increased capacity to 75 campers. The parking lot space along the side of the building included uneven and deteriorating asphalt. This area was determined to not be suitable for campers and not factored into the capacity determination as available outside space.

V. Recommendation

I recommend a modification of terms of the capacity to increase from 50 to 75 campers.
