II. Purpose of Addendum

A request to modify the capacity of the residential camp PROGRAM and residential SITE to a capacity of 311 campers.

III. Methodology

06/01/2023 Inspection Completed-Fire Safety: A

06/07/2023 Contact-Document Received: Request for Modification

IV. Description of Findings and Conclusions

On 6/7/23, the department received a written request for modification of the children's residential camp and campsite at Michawana. The request read in part "our current beds are at higher capacity than our license indicates. Our 12 Gitchie cabins were never added to the camp capacity and Big Bear was converted from a craft building to a sleeping cabin. The extra beds were never needed, but this year we've had enough growth that we need more beds this summer." The written requested included a breakdown of bathrooms and the camp provided a copy of the qualified fire inspection completed by Mike Larabel on 6/1/23.

On 7/12/23, I reviewed the qualified fire inspection. The report listed the approved capacity as 311. I reviewed the available bathroom areas; the number of bathrooms supports the increased capacity.

V. Recommendation

I recommend the modification of the capacity terms to be approved to 311 campers.
